

# Things You Should Never Have To Learn About Children With Brain Injury.... But Need To Know Anyway

*For all child advocates working with children affected by abuse or suspected abuse*

**November 19 ☿ 9:00 to 11:30 am**  
**Grand Island, NE**

*College Park, 3180 W Highway 34, Room 203*

Presenters **Louise Jacobs**, LICSW- mother of a son with a brain injury and **Brandon and Tiffany Verzal**, parents of a child with shaken baby syndrome share their personal journeys as parents, dealing with the effects of brain injury in their children.

## Content:

- Brain Injury Definitions, Incidence, and Statistics
- Brain Injury Signs and Symptoms
- Strategies And Resources For Working With Individuals With Brain Injury

***The workshop is FREE, but pre-registration is required.***  
***Contact Ginger Velandar at 308-385-5238 or [director@cn-cac.org](mailto:director@cn-cac.org)***

*Sponsored by the Brain Injury Association of Nebraska, Child Advocacy Center of Grand Island and Central Nebraska Area Health Education Center*

Alexis  
Verzal

- Child abuse is the cause of 64% of all infant head injuries
- 1 million children sustain a head injury each year
- TBI in children: 2,685 deaths a year
